

SANDEEP RATHOD

Software Engineer | Full Stack Developer | Python Developer | Generative AI Engineer

sandeepathod352005@gmail.com • +91-7019791922 • Bengaluru, India • Open to On-site, Hybrid & Remote

[LinkedIn](https://www.linkedin.com/in/sandeep-rathod): <https://www.linkedin.com/in/sandeep-rathod> • [GitHub](https://github.com/sandeep-rathod-2004): <https://github.com/sandeep-rathod-2004>

PROFILE

Software Engineer and Full Stack Developer with hands-on experience developing AI-powered applications using Python, React.js, FastAPI, LangChain, Google Gemini, FAISS, and Retrieval-Augmented Generation (RAG). Skilled in building scalable REST APIs, document intelligence systems, semantic search pipelines, and modern web applications. Passionate about Generative AI, backend engineering, distributed systems, and building production-ready software that solves real-world business problems.

TECHNICAL SKILLS

Frontend: React.js, HTML, CSS, JavaScript, Responsive Design, Dashboard UI

Backend: Python, FastAPI, Node.js, Express.js, REST APIs, Async Programming

AI & Workflow Automation: Google Gemini API, LangChain, LangGraph, RAG, Semantic Search, Prompt Engineering, Document Intelligence, Vector Databases, Celery, RabbitMQ, Redis

Databases: SQL, PostgreSQL, MongoDB, ChromaDB, FAISS

Software Engineering: SDLC, Agile, Debugging, Unit Testing

Tools: Git, GitHub, VS Code, Docker, Postman

INTERNSHIP EXPERIENCE

Software Development Intern — Full Stack & Generative AI

Feb 2026 – May 2026

ZSkillup Education Pvt. Ltd. • Remote

- Reduced feature delivery time by shipping 2 complete full-stack features per Agile sprint, as measured by sprint velocity, by building scalable document intelligence workflows with FastAPI and React.js serving multiple concurrent users.
- Improved system reliability by cutting bug count 40%, as measured by issue tracker metrics, by implementing layered testing and debugging across 3+ REST API integrations and their React.js frontends.
- Achieved seamless end-to-end data flow across all features, as validated by zero integration regressions per sprint, by designing clean REST API contracts in collaboration with a cross-functional team of 5 engineers.
- Performed API testing, debugging, and issue resolution to ensure reliable application performance.
- Prepared technical documentation, API documentation, and implementation notes for developed features.

PROJECTS

AI Invoice Audit Agent — Document Intelligence & Workflow Automation

React.js • FastAPI • LangChain • Google Gemini • FAISS • RAG

<https://github.com/sandeep-rathod-2004/ai-invoice-audit-agent>

- Engineered a multi-agent AI invoice auditing platform to automate invoice extraction, compliance validation, and audit report generation.
- Leveraged Retrieval-Augmented Generation (RAG) with FAISS to retrieve compliance rules for semantic invoice validation.
- Integrated Google Gemini to generate AI-powered audit reports and actionable recommendations.
- Created an interactive React dashboard for invoice analytics, workflow visualization, and downloadable reports.
- Designed modular FastAPI REST APIs for PDF processing, rule retrieval, invoice validation, and optimized SQL-based data access.

MERN + Gemini Chat Application

MongoDB • Express.js • React.js • Node.js • Google Gemini API

<https://github.com/sandeep-rathod-2004/mern-gemini-chat>

- Developed a real-time AI chat application by integrating Google Gemini with a MERN stack and backend prompt-context management.
- Architected secure REST APIs for chat sessions with structured validation and error handling.
- Designed a MongoDB conversation model to preserve multi-turn chat history across user sessions.
- Optimized frontend responsiveness through asynchronous Axios communication, loading states, and graceful error handling.

Document Intelligence System

Python • Streamlit • Google Gemini API • PyPDF2 • Prompt Engineering

https://github.com/sandeep-rathod-2004/document_react_model

- Created an LLM-powered document intelligence solution for semantic search, contextual question answering, and document summarization.
- Applied prompt engineering and contextual reasoning to extract accurate insights from structured and unstructured PDF documents.
- Designed an interactive Streamlit interface for document upload, AI-powered analysis, and instant question answering.

CORE STRENGTHS

- Full Stack Development | Python | FastAPI | React.js | JavaScript | REST APIs | Generative AI | AI Agents | RAG | Problem Solving

EDUCATION

B.Tech — Computer Science and Engineering, Visvesvaraya Technological University (VTU), Kalaburgi

Dec 2022 – May 2026

CGPA: 8.22 / 10.0
